DESIGNS ACCEPTED

PLANS FOR NEW MASONIC TEMPLE BY WOOD & DONN.

Handsome Structure to Be Erected in This City by the Fraternity.

The board of managers of the Masonic Temple Association met last evening at Scottish Rite Cathedral, No. 1007 G street northwest. The president, J. Henry Small, Jr., was in the chair, and there was a large attendance of the membership of the board, including Grand Master George H. Walker. The reports of the executive committee of the association, the building committee, and the consulting architect of the association, Mr. Edward A. Crane of the supervising architect's office, were received. Both the committees and the consulting architect had considered for some time the six different plans submitted by competing architects for the new temple. The several plans had been presented to the board and its subcommittees, and the consulting architect, without identification. At last night's meeting the reports of all were made. They agreed in favoring the design lettered C. Upon the opening of the envelopes this design was found to have been submitted by the firm of Wood & Donn of this city.

After some discussion the plans of this firm were unanimously accepted by the board. Their selection carries with it the appointment of Messrs. Wood & Donn as architects of the new temple. At the same time it is understood that the plans as accepted are in a sense only tentative. The plan of these architects came nearer to the desires of the board than the others, although it is agreed that all of those submitted had excellent features.

Temple's Front Elevation.

The illustration presented herewith by The Star is of the front elevation of the new temple according to the Wood & Donn designs. It will be seen that the home of the Masons of Washington is to be a beautiful and imposing structure, one of the grandest buildings of this character in the United States.

The corner stone of the building will be laid during the administration of the present

MILITARY TO TAKE PART.

Heavy Artillery to Participate in War College Ceremonies.

Capt. S. B. Davis, commanding the United States army quartermaster's department lighter Kearney, has been ordered to have his steamers in readiness to transport two companies of heavy artillery from Fort Washington, Md., to this city Saturday next, to take part in the laying of the corner stone of the Army War College building in the Washington Barracks Park. The troops will leave Fort Washington about 7 a.m. Saturday and will return to the fort after the ceremonies are over. The Kearney, which was hauled out on the marine railway at Alexandria, was put overboard yesterday and came up to this city.

THE WEIGHT OF COAL.

Commissioners Write Representative Babcock on the Subject.

Representative Babcock has received a communication from the District Commissioners in answer to an inquiry regarding the sale and delivery of coal. Complaint has been made, as well as inquiry as to whether a weight ticket should be required to be furnished with the delivery of the coal. In answer to this the Commissioners quote the law of March 2, 1885, for the appointment of a sealer of weights and measures, section 12 of which provides "That no person shall sell or deliver any coal within the limits of the District of Columbia unless there shall be delivered to the purchaser a charge of the wagon or conveyance used in delivering such coal a certificate duly signed by the person selling the same and showing the weight of the coal purporting to be delivered, the weight of the wagon or conveyance used in such delivery, the total weight of coal and the weight of the wagon or conveyance, and the name of the purchaser."

Section 13 provides "That no person in charge of the wagon or conveyance used in delivering coal, to whom the certificate mentioned in section 12 of this act has been delivered, shall neglect or refuse to deliver the weight of the wagon or conveyance used in such delivery, the total weight of coal and the weight of the wagon or conveyance, and the name of the purchaser."

Section 14 provides "That no person in charge of the wagon or conveyance used in delivering coal, to whom the certificate mentioned in section 12 of this act has been delivered, shall neglect or refuse to deliver the weight of the wagon or conveyance used in such delivery, the total weight of coal and the weight of the wagon or conveyance, and the name of the purchaser."

The Evening Star acknowledges receipt of the following contributions to the poor fund: V. K., \$10; P. B. B., \$2; "A Friend," \$1; J. E., \$5; total, \$18.

The Star has also received \$5 contributed by G. H. La Fetra, to be added to the fund of the Associated Charities.

Additions to Poor Fund.

At a meeting of the trustees of Richmond (Va.) College yesterday it was resolved to establish a school of technology, to be named in honor of Dr. J. L. M. Curry, who was for thirty-five years connected with that institution, first as one of its professors and during most of the time as trustee and president of the corporation. Dr. Curry was long an advocate for the establishment of such a school, and it is considered highly appropriate that such a memorial as is contemplated should take this form.

Florida Fruit Crop Escapes.

Reliable reports from all portions of south Florida indicate that the fruit crop has suffered no serious damage from the cold weather. The temperature dropped to a fraction below the freezing point Tuesday night, and there was a slight formation of ice yesterday morning. All danger to fruit is regarded as past.

Darrow a Legislator.

Clarence S. Darrow of Chicago was sworn in yesterday as a member of the Illinois house of representatives. Mr. Darrow was elected to the house last November as a public ownership representative, but had been unable to attend the session until now, owing to his engagements before the national arbitration commission as counsel for the United Mine Workers of America.

Eyeglass and Digestion.

From the Minneapolis Times.

A man of science announces the discovery that indigestion may be cured by properly adjusted spectacles. Defective vision is known to be caused by gastric disturbance; why may it not be possible that dyspepsia is sometimes due to bad eyes? If one can go to an optician and secure a prescription for a pair of glasses that will enable him to enjoy his hot sausage, fried potatoes and baking powder biscuit, science will be credited with one of the grandest triumphs.
